

Disaster Recovery as a Service (DRaaS)

DRaaS from Support Functions keeps your mission critical applications online — without the cost or complexity of building your own DR site

In an emergency, you need a DRaaS provider you can count on. After all, your business is at stake! Support Functions will work with you to set up Veeam Cloud Connect for Replication: a cost-effective, battle-tested solution from a service provider you can trust.

Benefits

Business Continuity	Recovery of mission critical infrastructure from active cloud servers in just minutes.
Simplicity	Quick to set up. Easy to use. 24/7/365 tech support from Support Functions.
Transparent pricing	Simple pricing with no hidden costs. Pay per GB (as low as \$0.22/GB) and per VM.
Convenience	Full site failovers can be initiated from anywhere via secure web portal (even a mobile phone).

Technical Details

Setup	Use your existing Veeam console to begin replicating to a secure cloud host.
RTO/RPO	Full and partial site failover with RPO and RTO of less than 15 minutes.

Networking	Simple networking over a single SSL/TLS port for secure and reliable connectivity (no VPN required).
Encryption	End-to-end encryption. Strong encryption of all data at source (before it leaves your network perimeter), in transit, and at rest.
Architecture	Stable, modern architecture. Built-in network extension appliances, compression, WAN acceleration, and storage snapshot capabilities.
Testing	Unlimited self-service testing. Simulate full site failovers without disrupting production.
Control	Initiate failovers yourself or allow our DR experts to manage this for you.

“Support Functions has exceeded our expectations. From continuously monitoring our network, to building our virtual infrastructure, to providing excellent support by responding to any issue at any time (something vital in our 24/7 business), we have been extremely happy with our decision to work with them.”

-Alonso G., Chief Financial Officer, E&C Mid-Atlantic
